Version: 2.1.1

SAP Cloud for Customer Integration with SAP SuccessFactors Employee Central - Change Log

Description: Fixed issue with modelling, that was not filling the source payload for extension iFlow

Date: 24-May-2020

Artifact: Replicate Employee manually from SAP SuccessFactors Employee Central

Version: 2.1.1

Description: Fixed issue with modelling, that was not filling the source payload for extension iFlow

[Release: 2.1.0](#)

Following *new features* have been added in release 2.1.0

1. Prior to this release Employee Central: Person/User ID (/queryCompoundEmployeeResponse/CompoundEmployee/person/logon_user_id) was mapped to Identity/ID in SAP Cloud for Customer. With this release the iFlows have been updated to map Username (/queryCompoundEmployeeResponse/CompoundEmployee/person/logon_username) to Identity/ID field in SAP Cloud for Customer

Note: For historical reasons, if you want to continue using EC User ID, the same can be controlled via passing value *true*, in the newly introduced parameter *Use Logon User ID*, after updating the iFlow to release 2.1.0

2. Support for employee termination is now enabled, can be controlled via the newly introduced value mapping artifact in the package.
3. All the iFlows in the package support customer extensions

[Release: 2.0.0](#)

Date: 23-Apr-2020
