Release: 2.3

Date: 16-May-2023

Artifact: Replicate Employee from SAP SuccessFactors Employee Central

Version: 2.3.1

Description: Following changes are made with this version.

- The write variable scopes is now integration flow specific, which allows run multiple copies of the integration flow in parallel need to connect multiple EC systems to multiple SAP Cloud for Customer tenants via a single SAP Cloud Integration tenant.
- Integration flow has been enhanced to provide a default role for replicated employees in SAP Cloud for Customer.
- Removed unused resources.

Date: 12-May-2023

Artifact: Replicate Employee manually from SAP SuccessFactors Employee Central

Version: 2.3.1

Description: Removed unused resources and integration flow has been enhanced to provide a default role for replicated employees in SAP Cloud for Customer.

Date: 26-Apr-2023

Artifact: Replicate Employee from SAP SuccessFactors Employee Central

Version: 2.3.0

Description: Integration flow has been optimized to support large loads. It is now possible to add WHERE clause to restrict the no of employees from Employee Central via the external parameter, *Filter for CompoundEmployee API*.

Date: 26-Apr-2023

Artifact: Replicate Employee manually from SAP SuccessFactors Employee Central

Version: 2.3.0

SAP Cloud for Customer Integration with SAP SuccessFactors Employee Central - Change Log

Description: Integration flow has been optimized to store the EC payload only if external parameter, *Extension Implemented*, is set to true.

Release: 2.2

Date: 28-Nov-2022

Artifact: Replicate Employee manually from SAP SuccessFactors Employee Central

Version: 2.2.3

Description: OAUTH support enabled for SuccessFactors SOAP receiver adapter

Date: 28-Nov-2022

Artifact: Replicate Employee from SAP SuccessFactors Employee Central

Version: 2.2.2

Description: OAUTH support enabled for SuccessFactors SOAP receiver adapter

Date: 18-Nov-2022

Artifact: Replicate Employee manually from SAP SuccessFactors Employee Central

Version: 2.2.1

Description: Correction provided for the integration flow so that the whitespaces are retained.

Date: 21-Oct-2022

Artifact: Replicate Employee from SAP SuccessFactors Employee Central

Version: 2.2.2

Description: Correction provided for the integration flow so that the whitespaces are retained.

Date: 17-Jun-2021

Artifact: Replicate Employee from SAP SuccessFactors Employee Central

Version: 2.2.1

Description: Correction provided for fetching records in pages during initial load from SAP SuccessFactors Employee Central.

Date: 11- Feb-2021

Description: Following new features are added in release 2102 for SAP Cloud for Customer:

1. New configuration parameter 'Skip Identity Update' is introduced in both replication integration flows, which can be used along with SCIM Integration to stop identity updates through employee path. Prerequisite is to Replicate Identity

SAP Cloud for Customer Integration with SAP SuccessFactors Employee Central - Change Log

Details parameter should also be set as 'true'.

2. Integration Flow 'Replicate Employee from SAP SuccessFactors Employee Central' is enhanced and now has two separate paths for initial / delta load. Since due to recent change in underlying EC API, it is not possible to pull employees which have been last modified more than 3 months ago, hence all delta loads > 3 months will be considered as initial load.
To overcome this limitation, variable GV_LAST_MODIFIED_DATE (under manage stores) needs to be deleted. This will re-perform initial load for all employees into SAP Cloud for Customer.

Release: 2.1

Date: 09-Dec-2020

Updated link for Integration Guide in the Document section

Date: 02-Nov-2020

Note: Minor version for all artifacts has been incremented by 1, to support SAP standard product taxonomy

Date: 30-Sep-2020

Artifact: Replicate Employee from SAP SuccessFactors Employee Central

Version: 2.1.4

Description: Now you can control replication of Identity node using the newly introduced parameter *Replicate Identity Details*. Default value is true, which ensures identity node is replicate to SAP Cloud for Customer.

Date: 30-Sep-2020

Artifact: Replicate Employee manually from SAP SuccessFactors Employee Central

Version: 2.1.3

Description: Now you can control replication of Identity node using the newly introduced parameter *Replicate Identity Details*. Default value is true, which ensures identity node is replicate to SAP Cloud for Customer

SAP Cloud for Customer Integration with SAP SuccessFactors Employee Central - Change Log

Date: 13-Aug-2020

Artifact: Replicate Employee from SAP SuccessFactors Employee Central

Version: 2.1.3

Description: Added a condition in the integration flow to only store the EC payload if customer opts for exit implementation to avoid memory issues.

Date: 29-May-2020

Artifact: Replicate Employee from SAP SuccessFactors Employee Central

Version: 2.1.2

Description: Updated the iFlow to exit gracefully (finish with status Completed) incase no record is returned from EC via the *CompoundEmployee* API

Date: 29-May-2020

Artifact: Replicate Employee manually from SAP SuccessFactors Employee Central

Version: 2.1.2

Description: Updated the iFlow to exit gracefully (finish with status Completed) incase no record is returned from EC via the *CompoundEmployee* API

Date: 24-May-2020

Artifact: Replicate Employee from SAP SuccessFactors Employee Central

Version: 2.1.1

Description: Fixed issue with modelling, that was not filling the source payload for extension iFlow

Date: 24-May-2020

Artifact: Replicate Employee manually from SAP SuccessFactors Employee Central

Version: 2.1.1

Description: Fixed issue with modelling, that was not filling the source payload for extension iFlow

Release: 2.1

Following *new features* have been added in release 2.1.0

1. Prior to this release Employee Central: Person/User ID (/queryCompoundEmployeeResponse/CompoundEmployee/person/logon_user_id) was mapped to Identity/ID in SAP Cloud for Customer. With this release the iFlows have been updated to map Username (/queryCompoundEmployeeResponse/CompoundEmployee/person/logon_user_name) to Identity/ID field in SAP Cloud for Customer

SAP Cloud for Customer Integration with SAP SuccessFactors Employee Central - Change Log

Note: For historical reasons, if you want to continue using EC User ID, the same can be controlled via passing value *true*, in the newly introduced parameter *Use Logon User ID*, after updating the iFlow to release 2.1.0

2. Support for employee termination is now enabled, can be controlled via the newly introduced value mapping artifact in the package.
3. All the iFlows in the package support customer extensions

Release: 2.0

Date: 23-Apr-2020

Artifact: Replicate Employee from SAP SuccessFactors Employee Central

Version: 2.1.0

Description: Support for all the above-mentioned features are introduced

Date: 23-Apr-2020

Artifact: Replicate Employee manually from SAP SuccessFactors Employee Central

Version: 2.1.0

Description: Support for all the above-mentioned features are introduced

Date: 17-Apr-2020

Artifact: Value Mapping for Integration between SAP Cloud for Customer with SAP SuccessFactors Employee Central

Version: 1.0.0

Description: New value mapping artifact introduced in the package.
