

## **1.0.0**

Content package created and published

## **1.1.0**

Integration package enhanced with support for managing Delivery and Billing Block on the sales order.

Following integration flows are updated to handle delivery and/or billing block events

1. Push Sales Order Changed Event – ver. 1.1.0
2. Push Sales Order Created Event – ver. 1.1.0
3. Push Sales Order Deleted Event – ver. 1.1.0

Following integration flows are added to retrieve more information of the sales order, and to unblock the sales order

1. Get Description Text – ver. 1.0.0
2. Remove Delivery and Billing Blocks from Sales Order Header – ver 1.0.0

## **1.2.0**

Integration package now supports both SAP Build Process Automation and SAP Workflow Management.

While configuring the workflow and process visibility APIs, the appropriate API endpoints should be configured.
