What's New in 2024.Q3?

Rapid FP&A Suite – Enhancements Across Rapid Finance, Rapid Sales, and Rapid Workforce:

- Story 2.0 Optimized Design Experience (ODE)
 - Features responsive panels in stories that adjust to varying screen sizes, providing a seamless user experience.
- Live S/4HANA-Based Analysis Reporting
 - Rapid Sales introduces the live Rapid Daily Sales Report connected to SAP S/4HANA, enabling real-time analysis.
- SAP Horizon Story Theme
 - Implemented across the suite, aligning with SAP XP&A strategy and operational business content.
- New Input Control and Planning Trigger Local Bar
 - Key story controls are now located in one location at the top of the story, easing user accessibility and simplifying the use of stories.
- Update to Story-Based Currency Toggle
 - Toggle now uses English descriptions when selecting “Local Currency” and “Global Currency” for clearer understanding.
- New XP&A Flex Public Dimensions

- Achieves a best practice balance between integration and front-end master data flexibility and enrichment, helping communicate Best Practices.
- New XP&A-Ready Suite-Based Account Dimension
 - Includes hierarchies for Finance, Sales, and Workforce in a single, comprehensive account dimension across the Rapid Suite.
- New Sample Master Data for SAP S/4HANA
 - Representative of dimensions used by live SAP Analytics Cloud customers, helping communicate Best Practices
- New Sample Transaction Data
 - Provides a broader scope and depth of sample transaction data, improving the quality of analysis and forecasting.
- Simpler Folder Structure and Object Naming
 - Navigation through folders is now easier with simplified naming and descriptions applied consistently across the Rapid Suite, improving user accessibility and efficiency.
- Rapid Documentation Moves to PowerPoint
 - PowerPoint-based documentation allows for easier consumption, adoption in training, and re-use in Rapid suite implementations.
