

Create Payment Plan – TCODE: EK92

Project Name: Utilities – EK92 - Create Payment Plan

Version	Description
1.0.0	Create Payment Plan – EK92 (TCODE)

INTRODUCTION

This bot is used to create the payment plan at EK92 transaction. This entire process will be automated.

- Will be supported for SAP Logon on-premise.

IMPORTANT NOTE

General

To use this sample, you need to have a basic knowledge and understanding of SAP Intelligent Robotic Process Automation tool. At the very least you need to know how to import a project, add and modify activities, build the solution, and export a package.

The screenshot shows a light blue background with several input fields. The 'Contract' field contains '6000001131'. The 'Payment plan type' field contains 'A12'. The 'Starting month' field contains '06' and has a magnifying glass icon to its right. The '* Start Year' field contains '2021'. The 'Alt. starting month' field is empty.

Required Inputs:

Input Field	Description
ContractNumber	Enter the Contract Number for Payment Plan Creation
PaymentPlanType	Enter Payment plan type for creation.
StartingMonth	Enter starting month for creation.

DESCRIPTION

Using SAP Intelligent RPA this bot will Create the Payment plan using EK92 Transaction.

Key Process Flows

- The bot takes input details (i.e., Contract Number, Payment Plan Type, Starting Month) from user.
- Opens transaction from any session of the SAP Logon (SAP GUI), without interrupting user's work

Note: Maximum number of Sessions should be below 6.

- Opens EK92 transaction.
- And creates a new Payment Plan.

Business Benefits

- Reduce manual effort—an employee can concentrate on the more important tasks
- Ensure fast creating of payment plan

VERSION

The product versions used to generate this sample are detailed below. This sample is provided “as is,” with no warranty that it will work correctly with other versions. If some versions of your software are different (such as the tool version or the target application version), you may need to recapture the application and/or update the workflow activities.

SAP Intelligent RPA

The table below details the versions used to generate this sample.

Software	Version
Cloud Studio	2.0
Desktop Agent	2.0.10.58

Target Application	Version
Saplogon.exe	750

The automation works on SAP GUI for Windows version 770 as well.

PREREQUISITES

Global setup:

SAP Intelligent Robotic Process Automation must be installed in accordance with the installation guide available [here](#). An SAP Intelligent RPA Factory must be available with a suitable environment and a hierarchy. All information can be found in the “Getting Started” section accessible via the above link.

Configuration:

The bots are designed to be executed in attended mode only.
