8 Switching to Package Integration - SF EC Payroll Integration to Exchange	20

1 Introduction

The [SAP SuccessFactors Employee Central integration with Strada for payroll](#) is available as an integration pack in the customer's SAP Cloud Integration account. The current main integration flow of this integration package only supports sending of data through web service (SOAP). It is not capable of sending data securely through Applicability Statement 2 (AS2) protocol. With Exchange 14.0 a new integration flow is made available to support AS2 to send data from SuccessFactors to Exchange securely using digital certificates and encryption.

This guide helps the client and SAP partner consultants to enable AS2 adapter in a Cloud Integration tenant for the new integration flow for AS2. This guide is a supplement to SAP [SuccessFactors Worklife Exchange Integration – Implementation Guide](#). It provides instructions that will assist in generating certificates and details on the configuration for the AS2 adapter.

2 Activate Enterprise Messaging

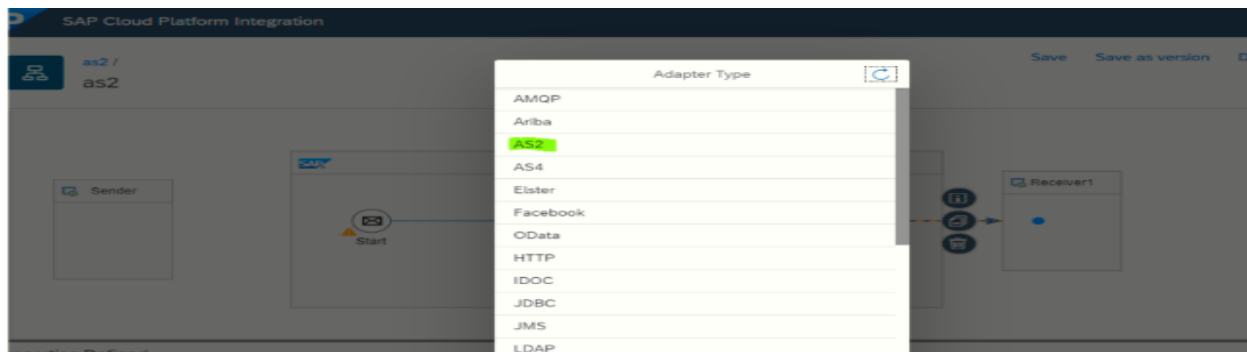

To activate enterprise messaging capabilities like AS2, JMS, XI (with JMS storage) adapters on all licensed versions of cloud integration tenants please refer to the following link:

<https://blogs.sap.com/2018/05/12/self-service-enablement-of-cloud-integration-service-on-consumption-based-commercial-model-for-sap-cloud-platform/>

<https://blogs.sap.com/2018/12/12/cloud-integration-activating-and-managing-enterprise-messaging-capabilities-as2-jms-and-xi-adapters/>

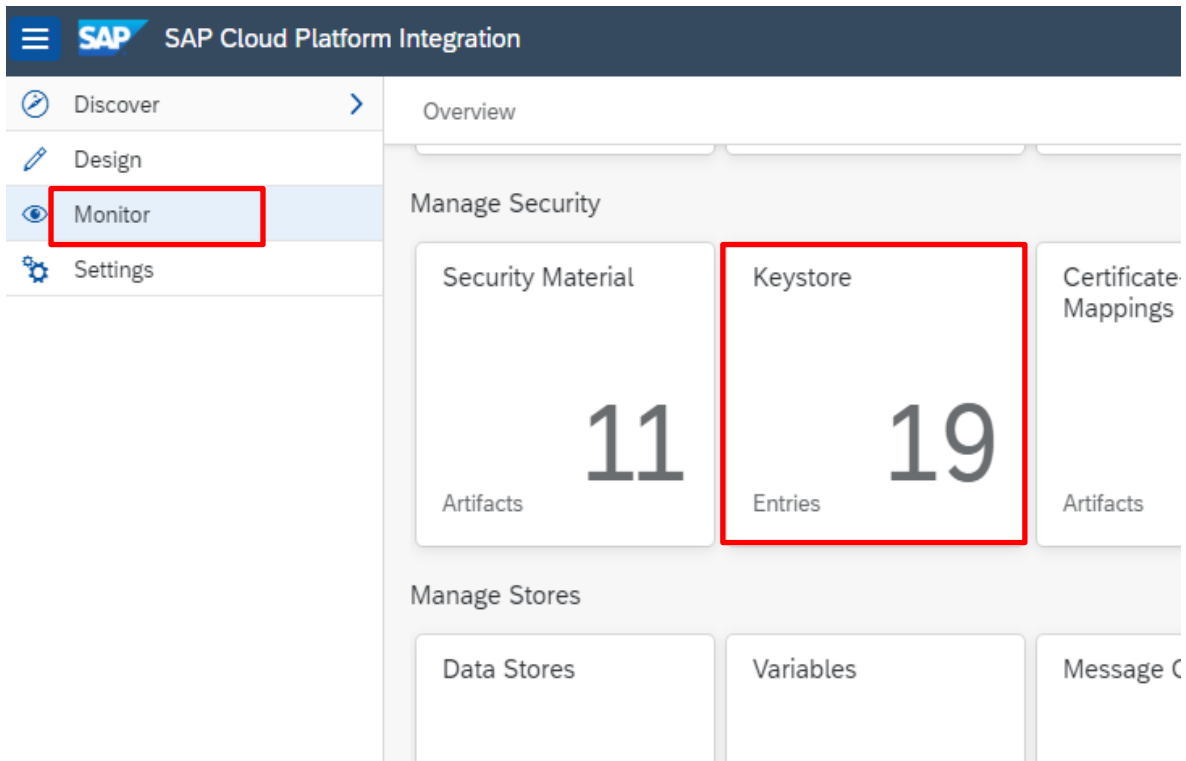

<https://help.sap.com/viewer/368c481cd6954bd0435479fd4eaf/Cloud/en-US/a74cddceacb34abb958e817c1f6782d2.html?q=Activate%20Enterprise%20messaging>

You should be able to see AS2 adapter type when creating an integration flow. Refer to screenshot below:

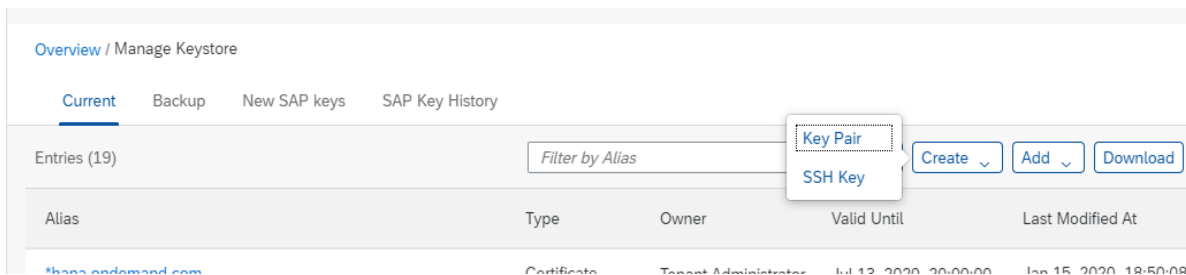

3 Generate Certificate for AS2

- Login to Cloud Integration tenant
- In the Monitor View, click **Keystore**.

- Create a New Key Pair

- Configure the Key Pair

Alias	as2_e700590_kp (You can put any Alias Name)
Key Type	RSA
Key Size	2048

Signature Algorithm	SHA-256/RSA
Common Name	Strada (You can put any Common Name)

Create Key Pair

*Alias:

*Key Type:

*Key Size:

*Signature Algorithm:

*Common Name (CN):

Organizational Unit (OU):

Organization (O):

Location (L):

State or Province (ST):

*Country (C):

E-Mail (E):

*Valid From:

*Valid Until:

Deploy Cancel

- Click Deploy
- Download the Certificate to and provide it to the Strada's EFT Team

4 Strada HR EFT Configuration

Create a Service-NOW ticket to Strada's EFT Team with the following details:

Area	ISO
Category	APP - Automation
Subcategory	EFT
Assignment group	GT - Platforms Engineering

Provide the following information in the ticket:

- Your certificate – This is the EFT Certificate that the EFT Team will give us
- Partner certificate – The generated certificate that we give to EFT Team
- Your AS2 identifier – EFT team AS2 ID
- Partner AS2 identifier – Cloud Integration tenant AS2 ID (suggestion technical name of the tenant)

Your certificate:	... \eu_ngahrhosting_com_2018
Partner certificate:	\\SM... \as2_e700590.cer
Your AS2 identifier:	NGAHR TEST
Partner AS2 identifier:	e700590
Authentication mechanism:	Username and password
Partner AS2 identifier mismatch policy:	Reject
EFT AS2 identifier mismatch policy:	Reject
Duplicate Message ID with different contents:	Reject
Duplicate Contents with different Message ID:	Reject
Message not signed:	Reject
Allowed signature algorithms:	SHA-256,SHA-384,SHA-512
Message not encrypted:	Reject
Allowed encryption algorithms:	AESCBC256
MDN send attempt timeout (seconds):	60
MDN send attempt retries:	3
MDN send attempt delay between retries (seconds):	30
MDN signing algorithm (MIC):	As requested or SHA-256
Transaction FAILED notification e-mail:	[Add]
Transaction SUCCESS notification e-mail:	[Add]
Transaction FAILED run command:	[Add]
Transaction SUCCESS run command:	[Add]
Move received data to folder:	\\SMB-DCB-SUP01.n... \n
Rename file(s) to:	%FS.FILE_NAME%
HTTP 1.0 mode (don't send HTTP/1.1 100 Continue):	<input type="checkbox"/>

Description	Value	Comment
System	NGA Human Resources	
Environment	TST	
AS2 identifier	NGAHR TEST	
Towards NGA Human Resources:		
URL for AS2 connection	http://eft-tst.eu.ngahrhosting.com	When you send to NGA Human Resources URL
IP address	212.190.78.50	IP address
Port	80	HTTP
Towards Partner:		
IP address	212.190.64.61	When NGA Human Resources sends to you IP address
AS2 Packaging	Signed and encrypted	
Notification method (MDN)	Synchronous and signed	
Encryption Algorithm (encryption)	AESCBC256	
Digest Algorithm (signing)	SHA-256	
NGA Human Resources AS2 certificate		To be installed on your system
Validity period	2 years	
Public/private key length	2048 bits	
Algorithm used for electronic signature	SHA256/RSA	
AS2 Certificate file	 eu_ngahrhosting_com_2018.crt	

5 AS2 Adapter Configuration in Integration flow

There is a new Artifact for AS2 together with the standard package, [SAP SuccessFactors Employee Central Payroll Integration 2.0 with Strada](#). The artifact (integration flow) is included once customer upgrades to the latest version of the package.

Package Integration - SF EC Payroll Integration to hrX Exchange via AS2 Extracts and sends employee records from Employee Central to hrX Exchange using compound employee service in delta mode. Created	Integration Flow	2.14.0	
---	------------------	--------	---

- Go to Package and Configure the AS2 Adapter.
- In the Receiver tab select AS2 Adapter, configure the following:

Configure "Package Integration - SF EC Payroll Integration to hrX Exchange via AS2"

Timer	Receiver	More
Receiver:	AS2Receiver	
Adapter Type:	AS2	
Connection		
Recipient URL:	<AS2 Endpoint>	
Proxy Type:	Internet	
Authentication Type:	Basic Authentication	
Credential Name:	<AS2 Credential>	

- **Connection**
 - Recipient URL : Will be provided by EFT Team

Environment	ISI
AS2 identifier	NGAHR TEST
Towards NGA Human Resources:	
URL for AS2 connection	http://eft-tst.eu.ngahrhosting.com
IP address	212.190.78.50

- Proxy Type : Internet
- Authentication Type : Basic Authentication
- Credential Name : AS2(Credential for EFT given by EFT Team)

Processing

Own AS2 ID:

Partner AS2 ID:

Message Subject:

Own E-mail address:

- **Processing**
 - Own AS2 ID : Any value, but make sure this is the ID you give to EFT Team
 - Partner AS2 ID : ID given by EFT Team
 - Message Subject : Email Subject (for notification)
 - Own Email Address : Email Address (for notification)

Security

Private Key Alias:

Public Key Alias:

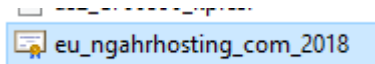

- **Security**
 - Private Key Alias : The generated [Key Pair](#) Alias
 - Public Key Alias : The certificate that the EFT Team provided

NGA Human Resources AS2 certificate		To be installed on your system
Validity period	2 years	
Public/private key length	2048 bits	
Algorithm used for electronic signature	SHA256/RSA	
AS2 Certificate file	 eu_ngahrhosting_com_2018.crt	

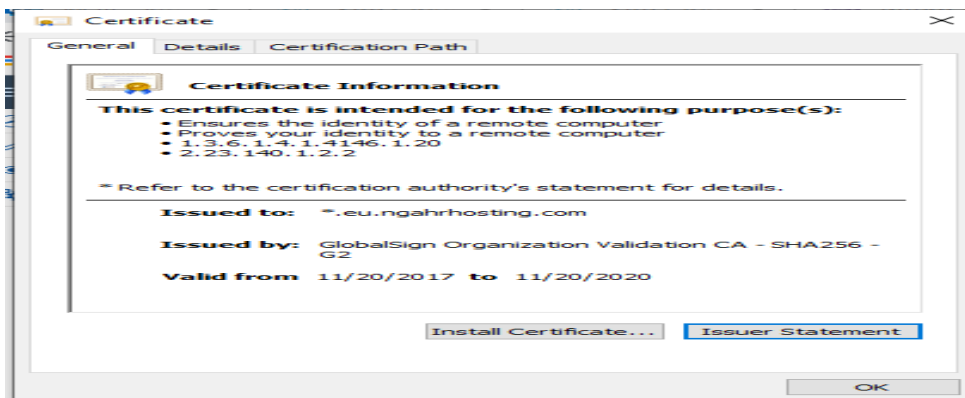

6 Importing Certificate from EFT Team

Since the .crt extension given by EFT cannot be imported to Cloud Integration Keystore, we need to convert it to install in Keystore.

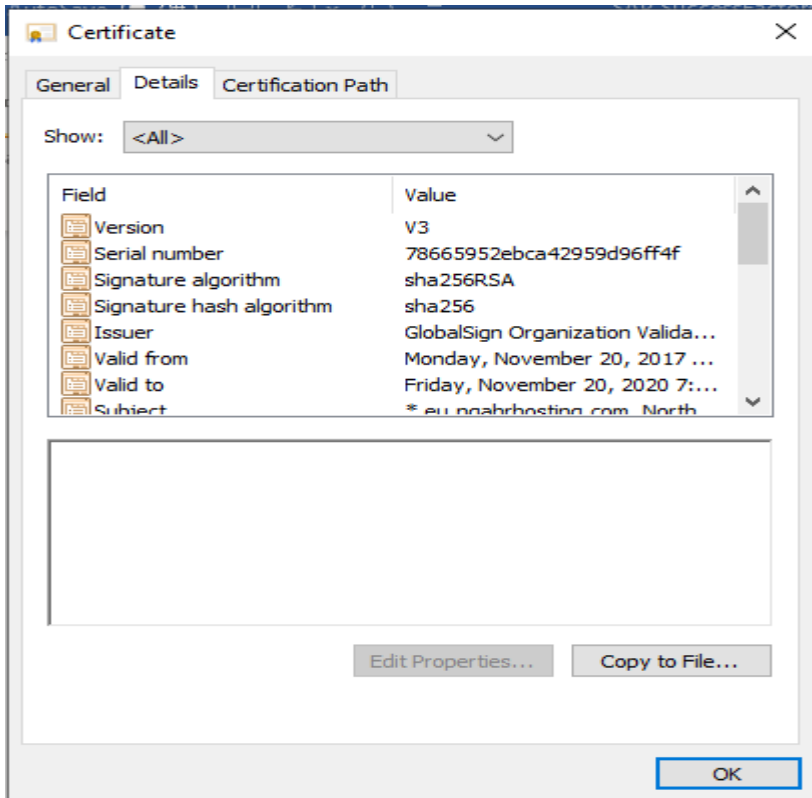

- Download the certificate given by EFT Team
- Double click the file

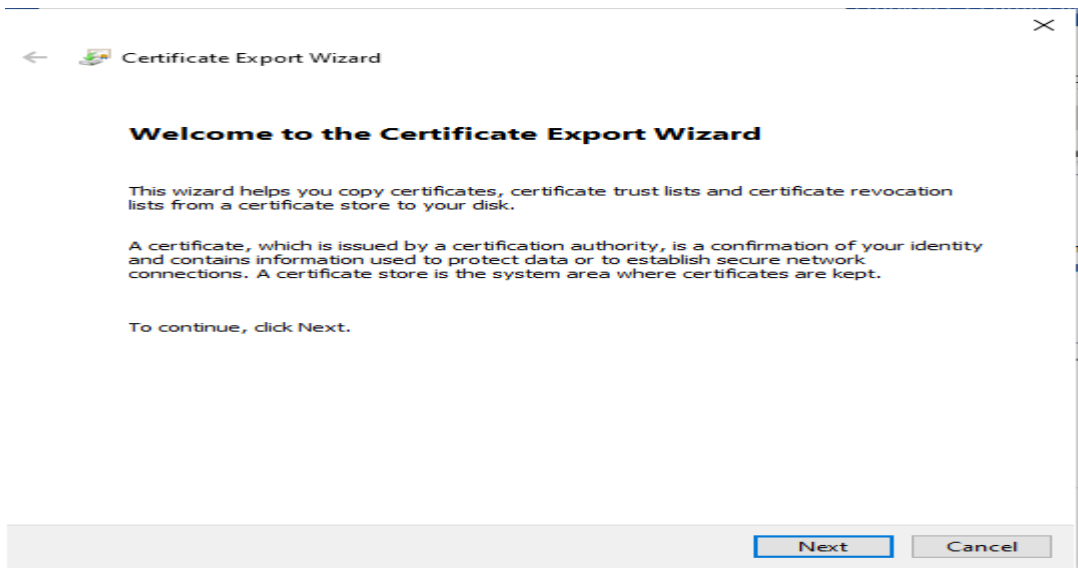

- A popup will appear for the certificate details.

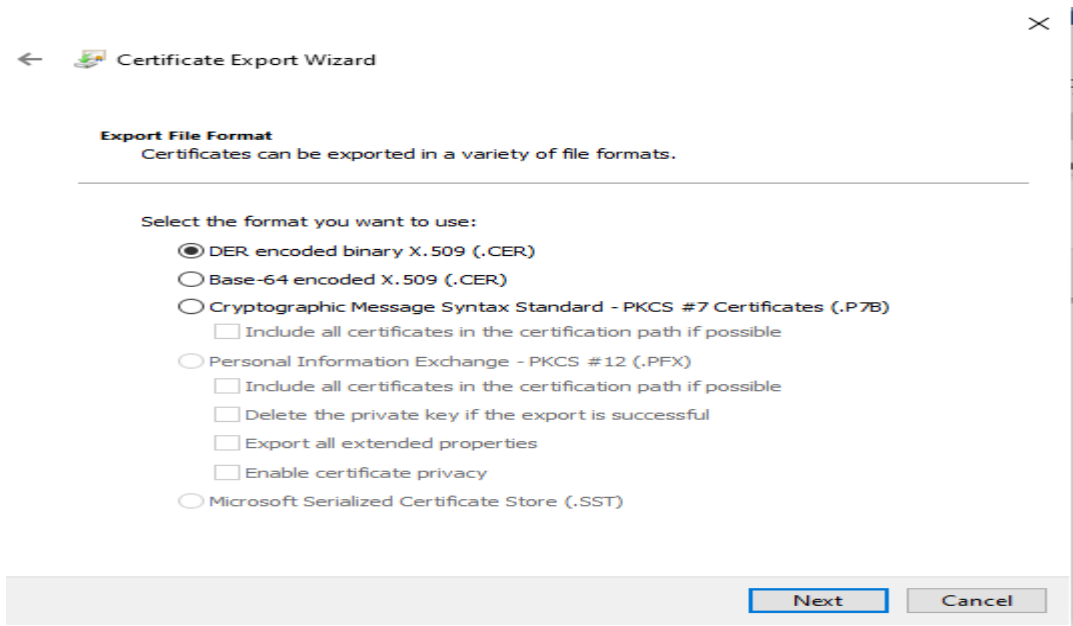

- Click Details tab and click Copy to File

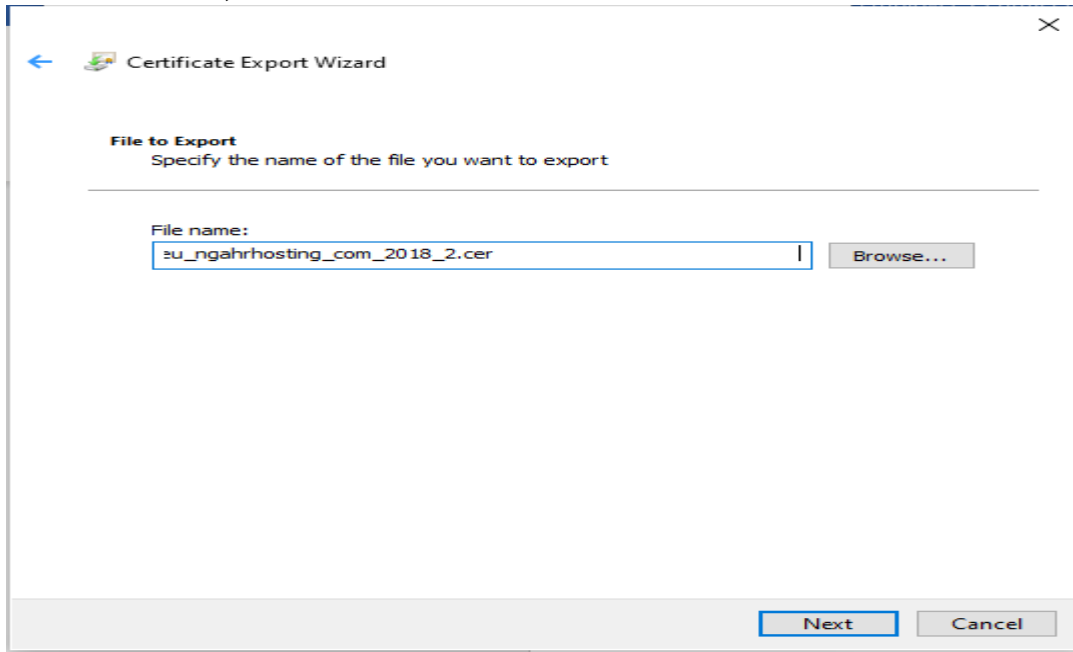

- Click Next.

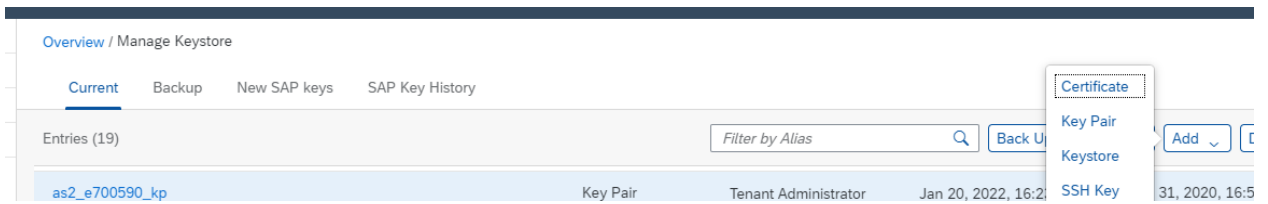

- Select DER and Click Next

Save the certificate, click **Next** and **Finish**.

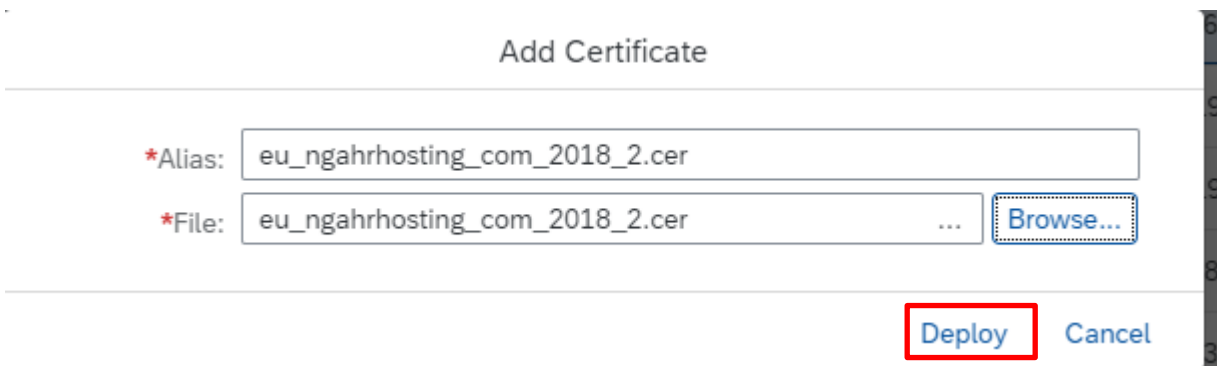

- Go back to Cloud Integration Keystore.
- Click Add Certificate.

- Browse the file

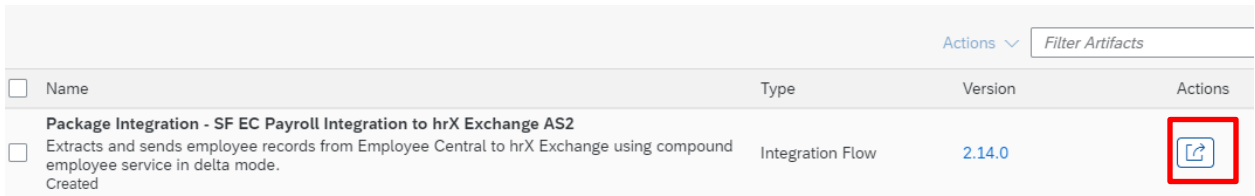

- Click Deploy

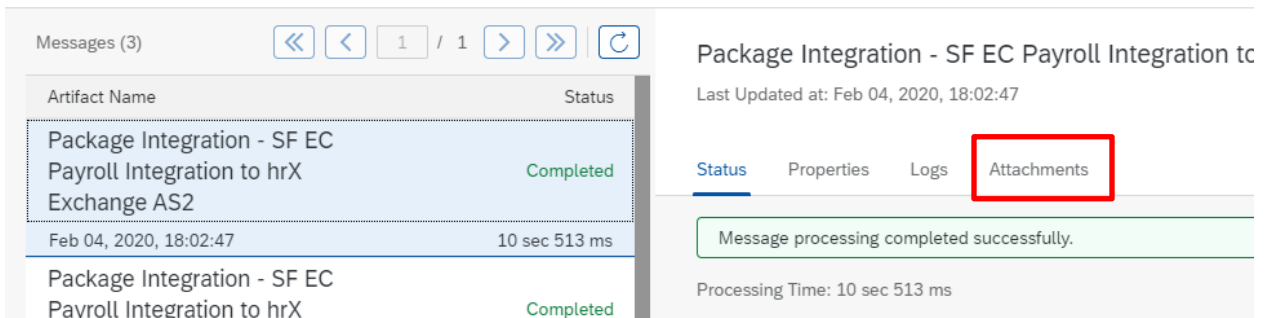

7 Integration Test

- Deploy the Package.

<input type="checkbox"/>	Name	Type	Version	Actions
<input type="checkbox"/>	Package Integration - SF EC Payroll Integration to hrX Exchange AS2 Extracts and sends employee records from Employee Central to hrX Exchange using compound employee service in delta mode. Created	Integration Flow	2.14.0	

- Check the attachment if there are Error(s).

8 Switching to Package Integration - SF EC Payroll Integration to Exchange

In Exchange release 17.0 all integration flows under the SAP SuccessFactors Employee Central Payroll Integration 2.0 with Strada integration package supports AS2 protocol. With these changes, customer using **Package Integration - SF EC Payroll Integration to hrX Exchange via AS2** can switch to using Package Integration - SF EC Payroll Integration to Exchange by following the set-up describe below.

An additional parameter for every integration flow is introduced to set if transmission is via webservice or AS2.

Enable AS2:

A new receiver is also delivered for every integration flows.

Timer Receiver More

Receiver:

Adapter Type:

Address:

A new integration flows, **Package Integration - SF EC AS2 Adapter** is created to handle AS2 support for all the iflows. See expected configuration below:

Configure "Package Integration - SF EC AS2 Adapter"

Sender Receiver More

Sender:

Adapter Type:

Address:

Sender details address input should match with the same value configured in the calling iflow.

AS2 receiver configuration:

Configure "Package Integration - SF EC AS2 Adapter"

Sender Receiver More
