

# Change log for the integration package 'SAP Predictive Replenishment Integration with SAP S4/HANA'

15/09/2022

Initial release

iFlow to transfer order proposals that are created in SAP Predictive Replenishment to SAP S/4HANA

16/09/2022

Version 1.0.1

- HTTP session settings are updated due to security reasons

03/02/2022

Version 1.0.2

- Rolled out a minor bug fix to handle an error scenario

31/05/2023

Version 1.0.3

- Rolled out a minor bug fix for an issue with the “custom\_extension\_enabled” parameter

09/06/2023

Version 1.0.4

- Rolled out a bug fix for mapping the commercial codes of units of measure for the order quantity

16/10/2024

Version 2.0.0

- Existing iFlow “Send Order Proposals from SAP Predictive Replenishment to SAP S4HANA” is now deprecated. This iFlow used the OData V2 API, to post purchase orders in SAP S/4HANA, which is now deprecated. Read more -
